8/29/31

Dear Jerry,

The enclosed review by Jon Walz is for your Kaplan collection. This reached more people than the Times, in Book World, but is less prestigious. Walz was his collaborator on the trial of Jack Ruby.

He drags Kaplan in for the buildup in the last paragraph, and then extraneously and erroneously, taking issue with someone belief that Leary "led the movement" for chnage in drug laws. Regardless of what one things of Leary, especially as compared with Kaplan's new book, this is factual.

But Walz uses it as a means of plugging Kaplan as a "rational leader".

There is always need today for a new dictionary.
